DETAILED ACTION

Claim Rejections - 35 USC § 102 35 USC § 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,7,8,¹⁰12-18,21-24 and 58-62 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Leonhardt et al for the same reasons as urged in the action of 10-10-00.

Response to Arguments

Applicant's arguments filed 7-16-02 have been fully considered but they are not persuasive. Applicants argue in the first full paragraph on page 7 of their response that "nowhere does Leonhardt et al. disclose or suggest that its servo tracks are formed in bands and that non-servo tracks delimit the bands of servo tracks." The examiner is not convinced by this argument since the reference discloses in col. 1, lines 10 to 30 that it is old to form a plurality of servo tracks bound on each side by data tracks. The plurality of tracks would inherently form a band. Therefore it is the examiner's opinion that it would have been obvious for one having ordinary skill in this art at the time the invention

Art Unit: 1762

was made to form the servo track and non-servo tracks of Leonhardt et al at col. 6, line 58 through col. 7, line 14 as suggested in col. 1, lines 15-30. Since applicants have not argued the limitations of the dependent claims they must agree with the examiner that they must stand or fall with the independent claim.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
